

Basketball Shopping Web Application

Nishant Kumar

Web Development Project

Introduction

Objective: To create a responsive basketball shopping website.

Technologies Used: HTML, CSS, JavaScript

Key Features:

- Product display
- Responsive design
- Image slider
- Contact form

Features

Wide selection of basketball products

Quality gear & apparel

Fast shipping & delivery

Design (Frontend)

- HTML Webpage structure
- CSS Styling & animations
- JavaScript Interactivity (form validation, image slider, animations)

Implementation Highlights

- Navigation Bar: Sticky & responsive
- Hero Section: Animated welcome with call-to-action
- Image Slider: Allows browsing product images
- Contact Form: With validation

Output / Screenshots

Insert screenshots of your running website here.

Challenges & Solutions

- Challenge: Making the website responsive

Solution: Used media queries in CSS

- Challenge: Adding interactivity

Solution: Used JavaScript DOM & event listeners

Conclusion

- Built a modern shopping web application
- Learned HTML, CSS, JS integration
- Future Scope: Add shopping cart & payment gateway
